MSK Technology

Who we are...

Following his passion for snow Bertin Metzger founded the company Metzger MSK. Until today the family-owned company from Black Forest plans, develops and produces Snowmachines and Icemachines for Wellness and Spa areas.

At the company headquarters in Hofstetten Bertin Metzger and his team impel recent developments and innovative products. The aim is to deliver from one hand a solid concept and perfectly adapted technology to the customer.

From the drawing table up to performed installation we offer best quality solutions with complete full service.

Examples of innovative applications amongst others are our Snowshower which produces a fine natural snow, the Ice Fountain which is perfectly applicable for cooling down, Ice Walls for passive and silent ambient cooling or the Ice Pool providing real ice layer. All our products ensure the needed cooling down after intensive sauna experience or are applicable as decorative highlight in different locations.

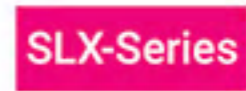

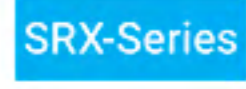

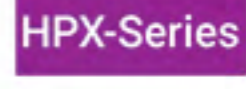

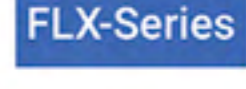

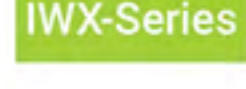

Realistic snow in trendy locations is optimal drawn into attention by us.

Snow Shower

MSK SLX-Series

Refreshing natural snow can be produced in every Wellness and Spa area with our Snowshower. The fine snow crystals are perfectly suitable to rub off the body after sauna sessions without injuring the skin by sharp-edged ice. After a while a snow cornice accrues and enables a real bath in natural snow. Let soft and hygienic natural snow sprinkle down on you and your guests.

Snow Fountain

MSK SLX-Series

Snow sprinkles down from Snowfountain into a drip pan or catch basin. Guests can take out the soft snow from bowl by hand. The snow provides perfectly cooling down after sauna experience or other heat treatments. Like at our Snowshower it provides a fine natural snow which not consists of sharp-edged ice.

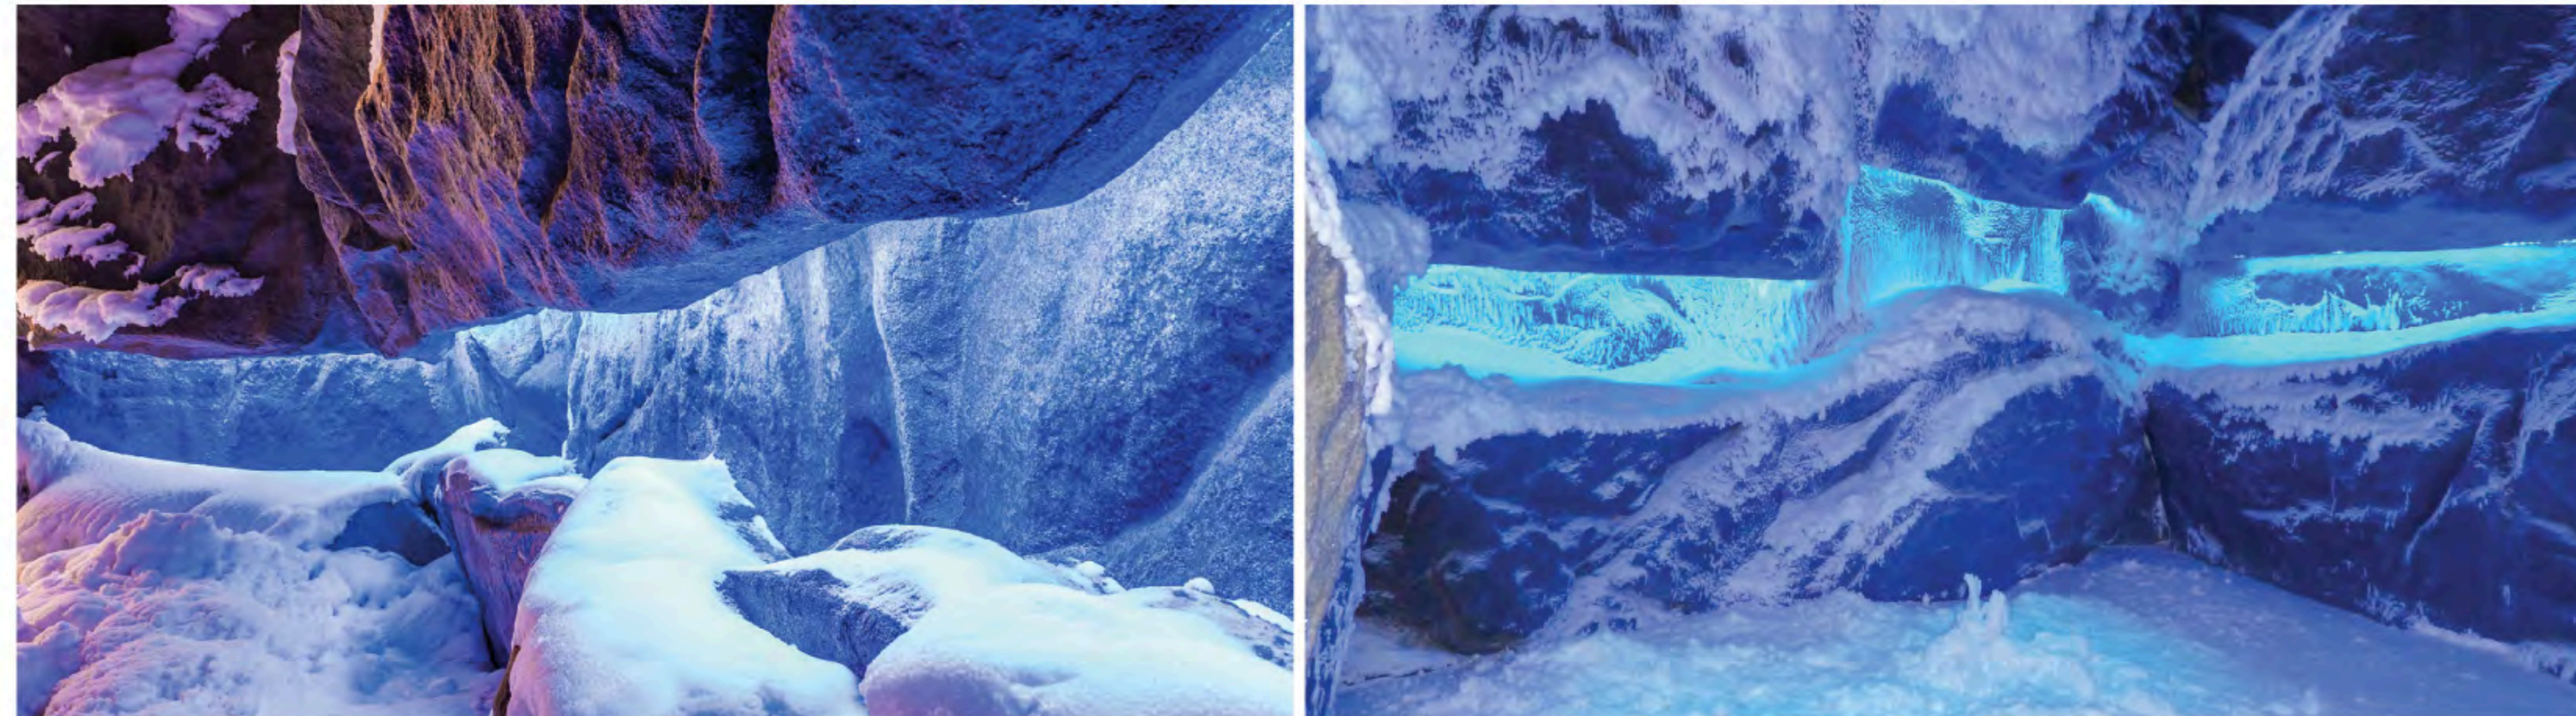

Snow Room

MSK SRX-Series

A Snowroom perfectly provide a complete cooling down after heat treatments. Moreover the Snowroom provides optimal medical treatments and therapies. The ambient temperature in the Snowroom is far less below the freezing point and enables a longtime preservation of snow. The fine powder snow place down equally at the walls, ledges, sculptures and on the floor. By such snow covering a fascinating snow landscape is generated.

By using color-coordinated illumination the Snowroom is drawn perfectly into right atmosphere and will be a highlight and attraction in your Wellness and Spa area for young and old.

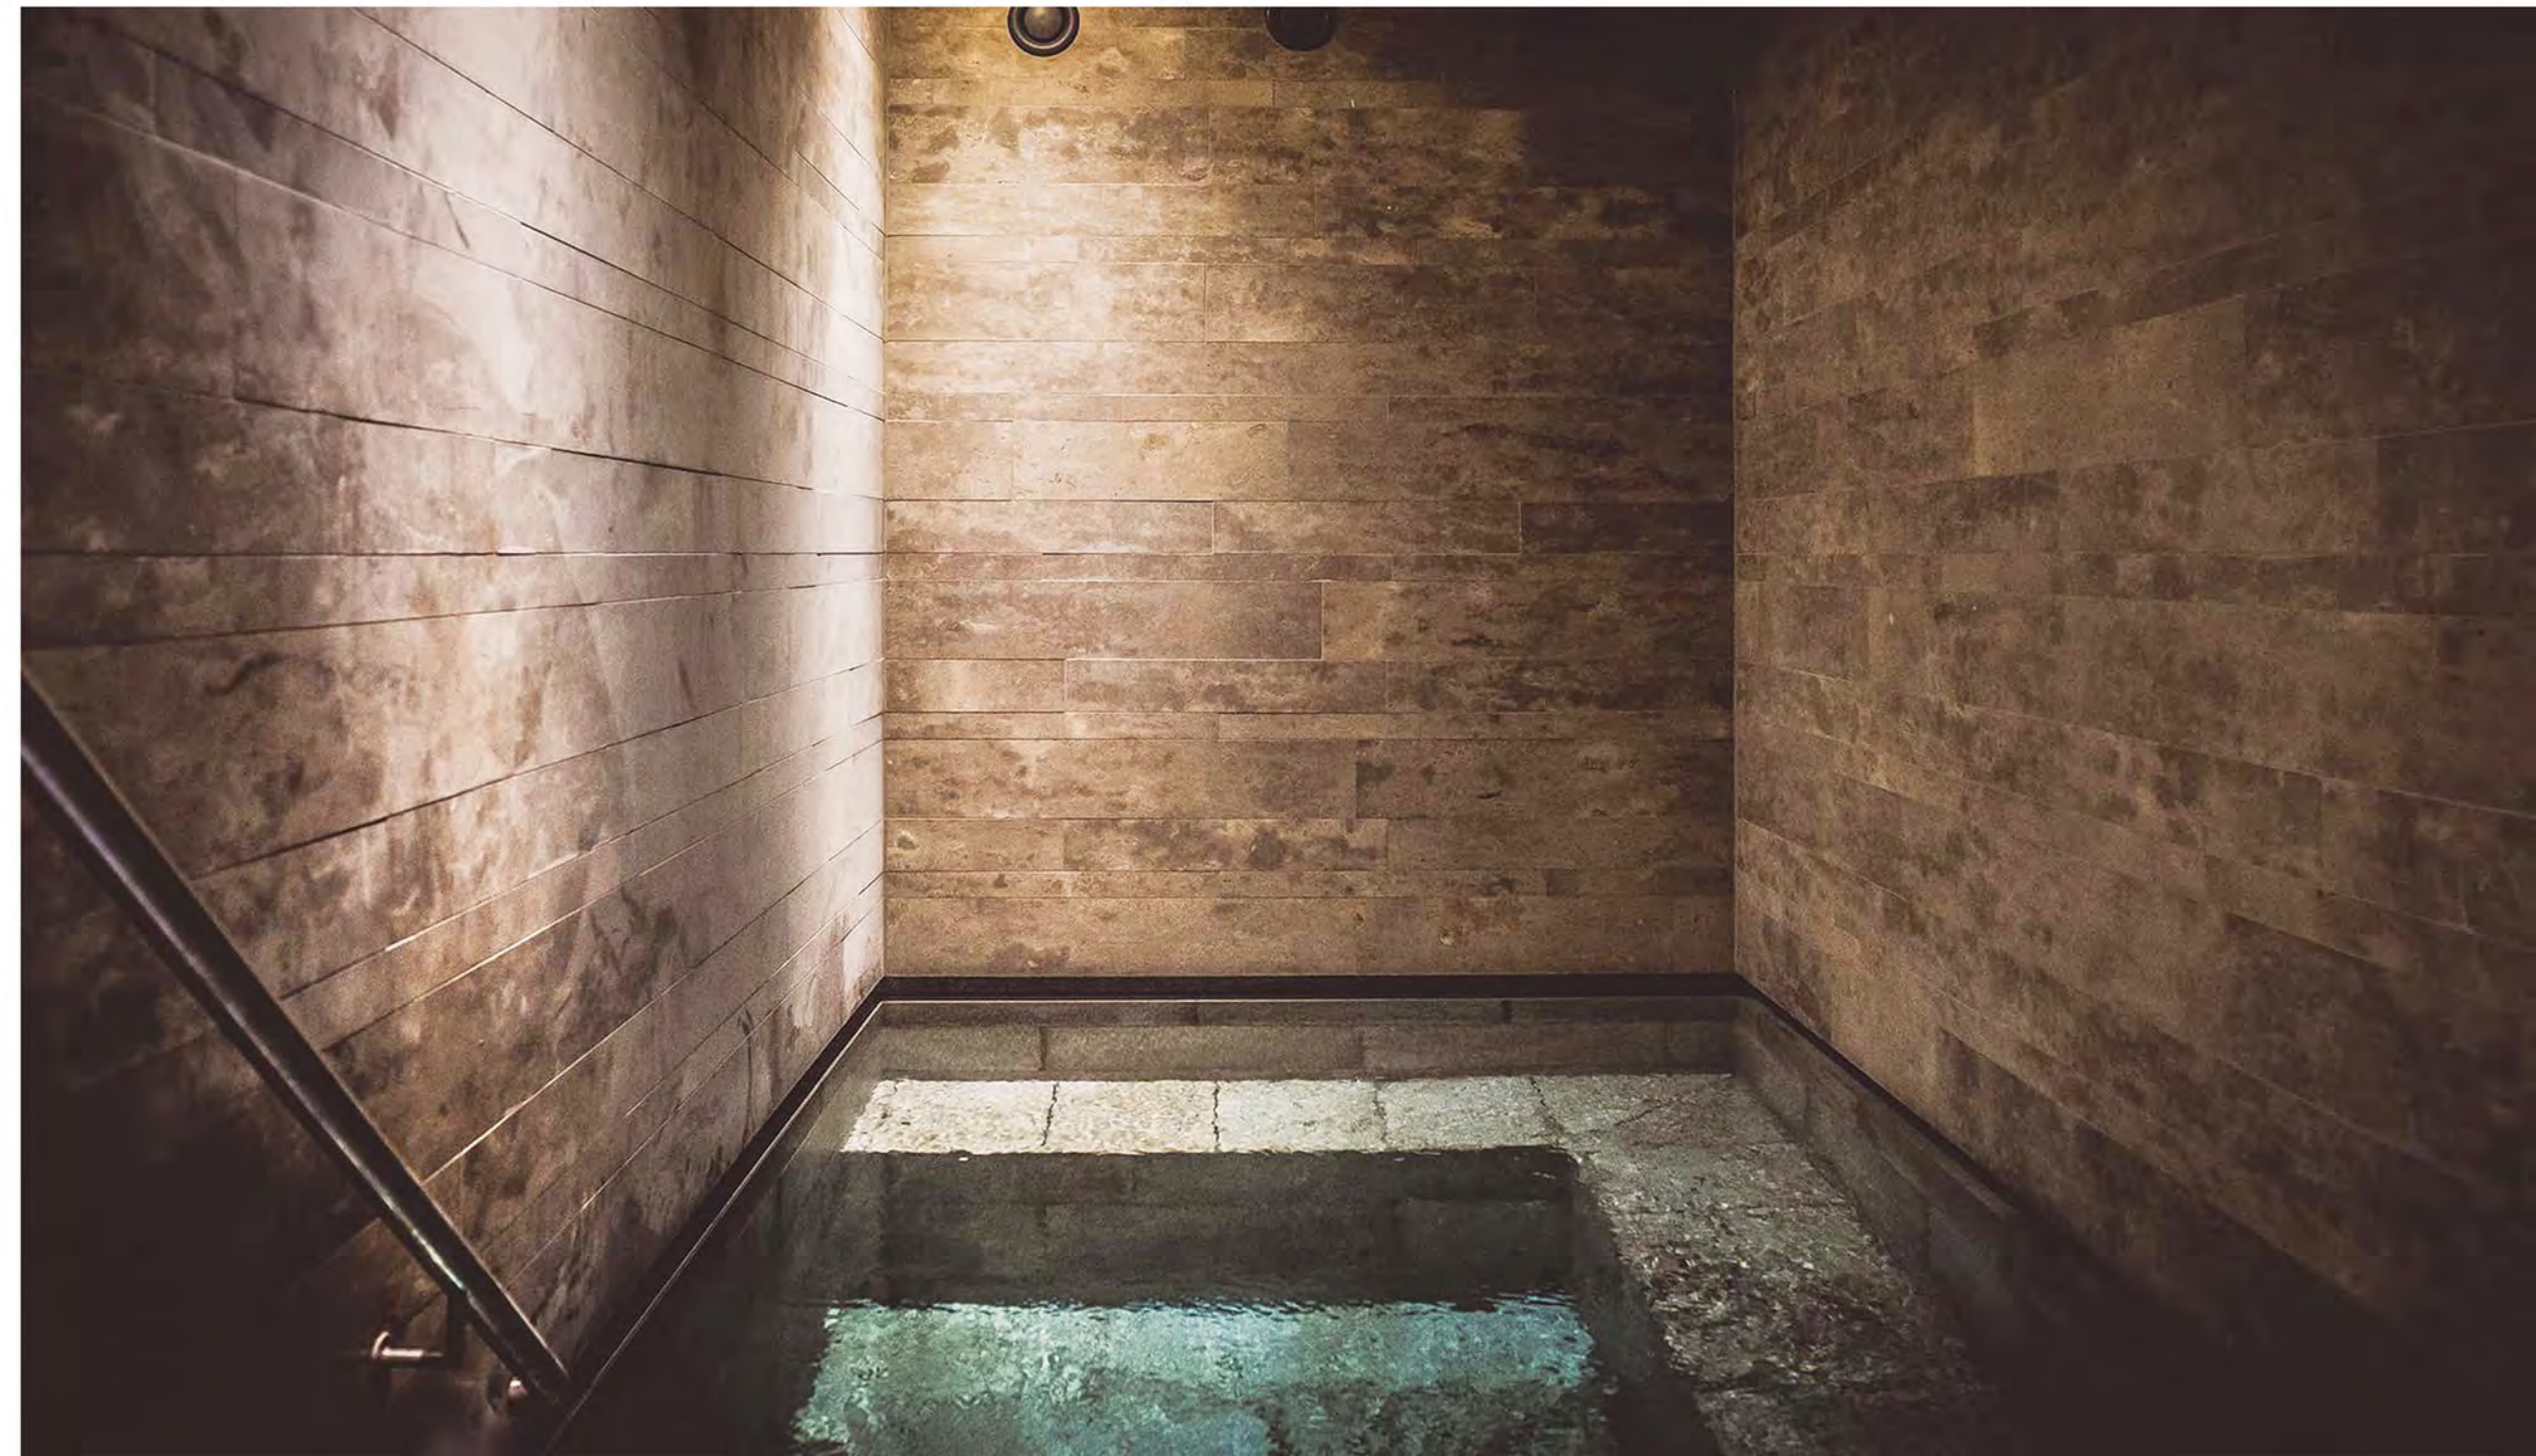

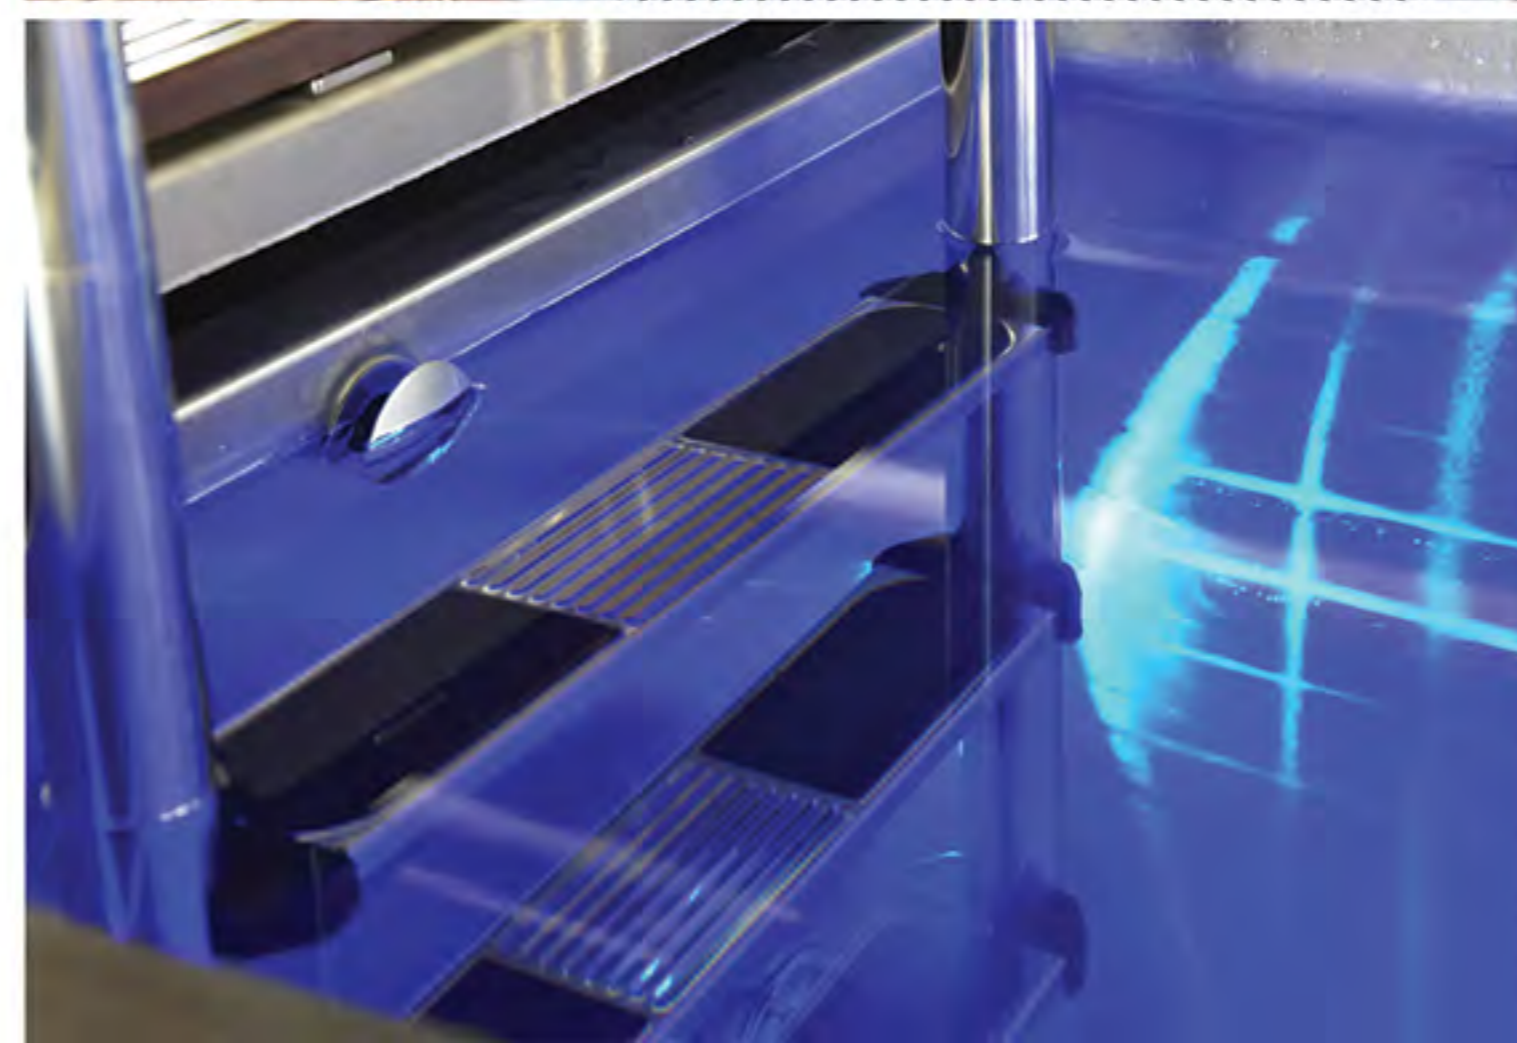

Plunge pool

MSK HPX-Series

The Plunge Pool provides an optimal cooling down after using Sauna or other heat treatments at temperature range of 5°C – 15°C. When plunging into the water the body will completely and consistent bathed. Therefore a 100% cooling down is guaranteed.

Such Plunge Pool is a great or small water basin which can be made by different materials like stainless steel, tiles or synthetic material. The plunge pool can be integrated easily into your Wellness or Spa area.

The body can distinctly relax by cooling down in the Plunge Pool. The contraction of the skin blood vessels supports a better blood flow of the internal organs.

Ice Pool

MSK IPX-Series

The Ice Pool is a deeply cold therapy basin in the size like a Whirlpool. The temperate range is generally between $+0,1^{\circ}\text{C}$ up to $+6,0^{\circ}\text{C}$ and comparable to an ice hole in the water well-known from Scandinavian countries. It is a traditional way of cooling down in this countries and to strengthen the immune system.

Because of the low temperature a real ice layer grows up at the inside walls shortly.

For a special „thrill“ you can optionally add ice cubes to the water. By using a concerted illumination the ice can be wrapped into emotional light and provides relaxation for mind and soul.

Ice Fountain

MSK FLX-Series

An Ice Fountain produces usually small ice particles into a drip pan and can be used to rub the body after using a Sauna. By this method you generate a particular kind of cooling down and creates a tingling feeling on the skin. The circulatory system will get stimulated and the immune system strengthened.

The Ice Fountain offers various installation options. The ice can fall down from top or even rise up from bottom like a fountainhead.

Ice Wall

MSK IWX-Series

The Ice Wall can be used as optical highlight or as noiseless ambient cooling. A natural ice layer will be created on the surface. Create for example an eyecatcher for your lobby, Snowroom or Wellness and Spa resort.

Atmospheric humidity of the room will get lowered by the Ice Wall and creates a comfortable indoor climate. A Frigidarium can be air-conditioned by using Ice Wall as well.

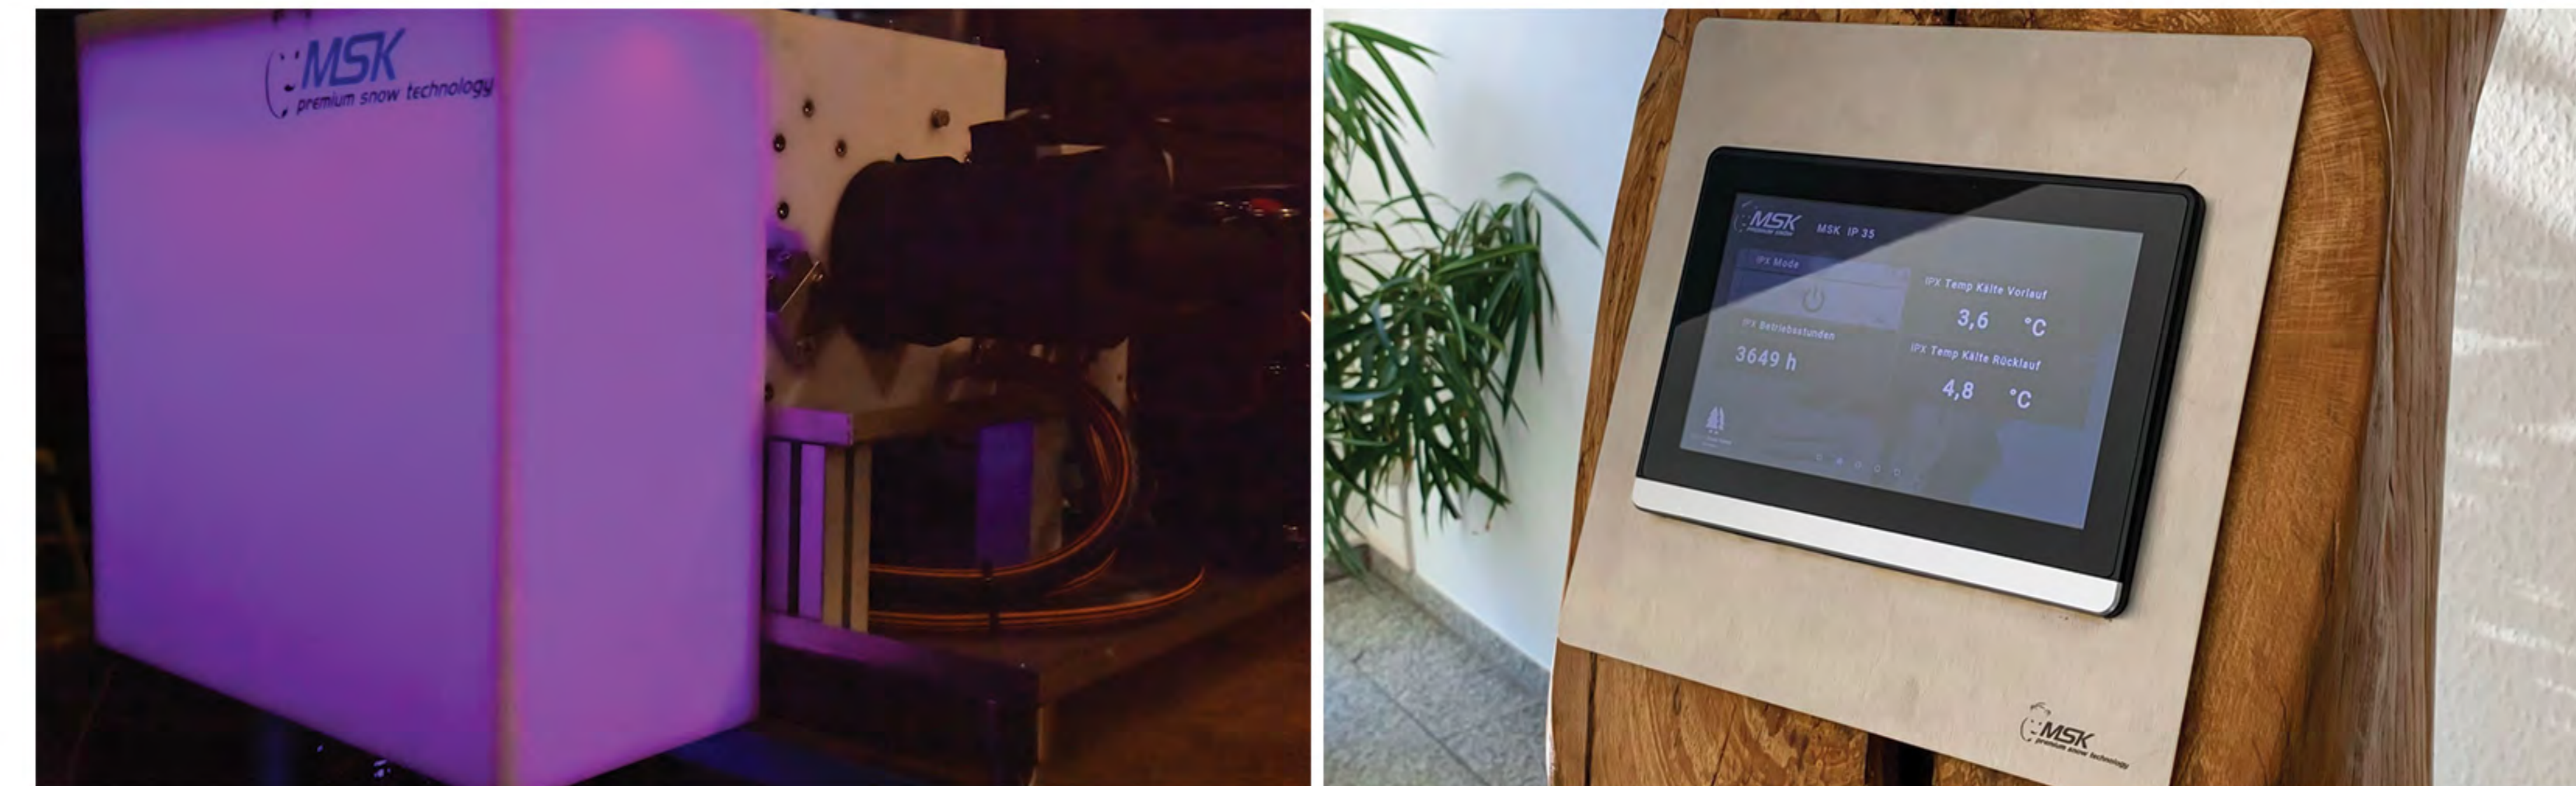

Accessories and Optionals

A wide range of options and add-on modules is offered additionally for our products which can be combined individually and adapted to every requirements. Thanks to our modular design we will find a suitable solution for every project.

By using latest RGB-LED illumination technology we let your Wellness and Spa area appear in the right light.

A comfortable operation and configuration of the plants is provided by our large color touchscreen. Status messages and indications can be displayed as well.

Our sales team supports you by finding a suitable concept for the realisation of your project from start to finish.
